# 解答小学5年生

ゴール

## 小数のかけ算・わり算

$$\begin{array}{r} 37.5 \\ 0.375 \end{array} \times \begin{array}{r} 375 \\ 0.0375 \end{array}$$

3 ÷ 5 の商を小数と分数で表しましょう

$$0.6 \quad \frac{3}{5}$$

$$80 \times 2.3 = 184$$

$$8 \div 2.5 = 3.2$$

$$2.14 \times 3.8 = 8.132$$

$$1.8 \div 2.4 = 0.75$$

$$0.18 \times 3.4 = 0.612$$

$$2.34 \div 3.9 = 0.6$$

$$300 \div 2.5 = 120$$

$$7.56 \div 6.3 = 1.2$$

## 分数のたし算・ひき算

$$\frac{3}{4} = \frac{12}{16}$$

$$\frac{1}{5} + \frac{1}{2} = \frac{7}{10}$$

$$\frac{3}{4} - \frac{2}{3} = \frac{1}{12}$$

$$\frac{1}{6} + \frac{3}{8} = \frac{13}{24}$$

## 分数のかけ算・わり算

$$\frac{4}{5} \div 3 = \frac{4}{15}$$

$$\frac{4}{5} \div 2 = \frac{2}{5}$$

$$\frac{5}{8} \times 3 = \frac{15}{8} \left(1\frac{7}{8}\right)$$

$$\frac{2}{5} \times 2 = \frac{4}{5}$$

## 面積・体積

$$6 \times 5 \div 2 = 15 \quad 15 \text{ cm}^2$$

$$4 \times 6 \times 5 = 120$$

$$120 \text{ cm}^3$$

$$5 \times 5 \times 5 = 125$$

$$125 \text{ cm}^3$$
